

Chicago & Eastern Illinois Historical Society

Custom run C&EI Standard Station HO Scale Kit

Laser Cut Wood Kit by HRM Laser Models

Block Station, Block IL

HO Scale Standard Station Model

The Chicago & Eastern Illinois Historical Society is offering a HO scale station kit by HRM Laser Models. This station is the standard station design built by the C&EI primarily on the Woodland cutoff line to Villa Grove, although similar stations can be found all along the railroad.

The kit features laser cut walls, windows, doors, and roof. The kit also includes laser cut shingles and a partial interior. Known station locations include Allerton, Block, Bongard, Bourborn, & Ellis.

We believe the original colors to be light green with dark green trim. Stations were painted white in the early 1950s. The kit comes unpainted. The prototype station had a tile roof, the kit will have a shingle roof.

Bongard Station, Bongard IL
